

STRIP-CLEAN DISCS

These coarse synthetic fiber discs are impregnated with abrasive grit, and are a safer alternative to wire bristle brushes. Use to remove surface material without damaging the under-surface. They are ideal for:

- Paint removal
- Cleaning rust and corrosion
- Freshening old wood
- Cleaning boat hulls

They are available in two different configurations as follows:

- T-27 depressed center which can be direct mounted on to a right angle grinder.
- With a quick change Type R button for use with our holders.

T-27 style for direct mount on tools with 5/8-11 arbors

T-R style for use with quick change holders. See note below.

Part No	Description	Max RPM	Pack
T-27 Depressed Center Style			
680091	Strip-Clean 4-1/2" x 7/8" arbor	11,500	10
